PROFESSIONAL OBJECTIVE

Java Backend Developer with experience in Spring Boot, REST APIs, JMS/MQ, and enterprise integrations in the banking sector. Skilled in SOAP services, SQL (PostgreSQL, MySQL, Oracle), Maven, AWS S3 and GitHub Actions CI/CD. Working in Java 8/11 professionally, practicing Java 17. Seeking to grow in cloud and DevOps.

SKILLS

Backend:

- Spring Boot (Intermediate Level): Development of REST APIs and Microservices with Maven. Implementation of security with Spring Security and JWT, and data persistence with Spring Data JPA.

Java EE (Basic): Knowledge of Java enterprise environments and application development.

SOAP / Web Services (Basic): Integration and consumption of SOAP-based web services.

JMS / MQ (Basic): Enterprise messaging using JMS and Message Queues.

Databases:

- SQL (Basic Level): Management of relational databases such as PostgreSQL, MySQL, and Oracle.

Cloud & DevOps

- Version Control: Git & Subversion (branches, PRs); AWS S3; GitHub Actions CI/CD.
- Containers: Docker (Basic), interest in Kubernetes.
- IDEs: IntelliJ IDEA, Visual Studio Code.

Soft Skills:

- Self-taught and continuous learning
- Teamwork and collaborative support
- AI-assisted development: Claude Code, Gemini, MCPs, prompt engineering
- AI-generated code review & validation

EDUCATION

2019 - In Progress | San Salvador, El Salvador

University of El Salvador

Computer Systems Engineering

COMPLEMENTARY TRAINING

2023 | San Salvador, El Salvador

KODIGO | Creative Technology Academy

Bootcamp Full Stack Jr.

Frontend and Backend Development

2024 | San Salvador, El Salvador

One Oracle Next Education | Alura Latam

Java Backend Specialization

Java Backend

EXPERIENCE

April 2024 - May 2024 | San Salvador, El Salvador

PROFESSIONAL PROJECT

QUANTO | Full Stack Junior Developer

Participated in the maintenance and bug fixing of a product management system. Worked with a technology stack that included Angular 16 with Ionic Framework.

My main responsibilities included identifying and resolving errors in the system.

May 2025 - Present | San Salvador, El Salvador

TechyWe | Java Backend Developer

BH (Banco Hipotecario) | Java Spring Boot

Joined an existing employee batch-processing and product-assignment middleware for Banco Hipotecario (BH), built with Java Spring Boot and Maven. Performed technical analysis, fixed bugs, and implemented code improvements to the backend codebase and database.

Currently provide production maintenance, resolving reported incidents and bugs to ensure platform reliability.

Billing RUBRIDOC | Java Spring Boot

Contributed to the development and maintenance of a production electronic billing system built with Java Spring Boot, Maven, and AWS S3 for document storage.

Implemented new REST API functionalities, optimized existing processes, and resolved critical bugs to improve system performance and reliability.
